

ExamView®

test generator

With ExamView, You Can:

ExamView has everything you need!

- Using the dynamic content features allows you to create a large number of questions of the same form. Each time a student takes a LAN-based test or begins a tutorial session the question values change, providing an unlimited number of questions.
- Numerous test layout options have been added that give even more control in formatting the appearance of a test. (e.g. TAKS, FCAT, GED, GMAT, NCLEX, etc.)
- Publisher-created ExamView question banks are available for over 2,000 textbooks from a wide variety of educational publishers.
- Now it's a snap to insert various graphs (Cartesian, polar, and number line). Simply select the graph type, set a few options and your graph is inserted.
- Bimodal questions give instructors more flexibility when building a test. Bimodal questions can be displayed in multiple choice or short answer format.
- Saves teachers up to five hours per week creating and grading tests.
- Improves student results by allowing you to focus on specific learning objectives.
- High-stakes practice tests using the online capabilities give instructors instant feedback at a low cost.

- create paper, Internet and LAN-based tests in less than five minutes.
- easily import questions from any word processor.
- create multiple versions of the same test.
- easily create student worksheets.
- grade computerized tests automatically.
- grade printed tests easily with printed answer strips.
- download grades easily to many gradebook programs.
